

## Learning in a COVID-19 World: Summary of Student Survey Results

Below is a summary of results for the 'COVID-19' survey conducted in 2021 and completed by students.

The results have been broken down by year level and decile. Only questions regarding learning progress and wellbeing have been included.

Response options for most questions were:

- Strongly agree
- Agree
- Somewhat agree
- Somewhat disagree
- Disagree
- Strongly disagree
- Don't know

For reporting we:

- Excluded "don't know" responses
- Aggregated "strongly agree" and "agree" responses to reflect an agreement response
- Aggregated "strongly disagree" and "disagree" responses to reflect a disagreement response
- Those who responded with "somewhat agree" or "somewhat disagree" were included in the totals but not reported explicitly

For the "I feel happy" question the response scale is different.

Released under the Official Information Act 1982
